# import recipients

**Description**

import 2 test recipients to an existing group

See also sync-mode and sync-qualifiers

Example request

```
<control xmlns="http://webservices.ecircle-ag.com
/ecm" request-id="1" group-id="1">
    <member-list sync-mode="add" add-mode="
add_no_message">
        <user>
            <email>test11@dropmail.ecircle.com<
/email>
        </user>
        <user>
            <email>test12@dropmail.ecircle.com<
/email>
        </user>
    </member-list>
    <failure-report-address xmlns="
http://webservices.ecircle-ag.com/ecm">
        <email>saduser@mapp.com</email>
    </failure-report-address>
</control>
```
