

CONTROL XML CXML

IMPORTANT

please note this documentation is no longer being updated. for the most up to date information, please visit [Engage API](#)

Control XML (CXML) is an alternative to the SOAP and REST interfaces for transferring large volumes of data. It is a SOAP document with an authentication header and a comprehensive body. In addition to the XML, large attachments with recipient lists can be uploaded.

The following goals could be achieved with control XML

GROUP DEFINITION

- [create a group](#) with [deactivation-settings](#)
- [clone a group](#)
- [import recipients](#)
- [import recipients - gzipped file](#)

MESSAGE SPECIFICATION

- [send message](#)
- [send embedded message](#)
- [split sendout](#)
- [split sendout embedded](#)

REPORT DEFINITION

- [send success/failure report](#)
