

# MessageFilter

Available in version v7+

A filter object that determines which messages are included in the list of returned message summary objects.

| Name              | Type                          | Description                                                                                               | Constraints |
|-------------------|-------------------------------|-----------------------------------------------------------------------------------------------------------|-------------|
| externalMessageId | <a href="#">String</a>        | The external message ID                                                                                   | optional    |
| messageName       | <a href="#">String</a>        | The name of the message.                                                                                  | optional    |
| subjectLine       | <a href="#">String</a>        | The message subject line.                                                                                 | optional    |
| authorName        | <a href="#">String</a>        | The name of the message author. Uses the format: lastname, firstname.                                     | optional    |
| authorId          | <a href="#">Long</a>          | The user ID of the message author.                                                                        | optional    |
| messageCategoryId | <a href="#">Long</a>          | The message category ID.                                                                                  | optional    |
| groupName         | <a href="#">String</a>        | Name of the group assigned to the message.                                                                | optional    |
| groupId           | <a href="#">Long</a>          | The group ID.                                                                                             | optional    |
| groupCategoryName | <a href="#">String</a>        | The name of the group category.                                                                           | optional    |
| groupCategoryId   | <a href="#">Long</a>          | The group category ID.                                                                                    | optional    |
| type              | <a href="#">MessageType</a>   | The message type.                                                                                         | optional    |
| status            | <a href="#">MessageStatus</a> | The current status of the message.                                                                        | optional    |
| sendoutDateFrom   | <a href="#">String</a>        | Start date of time frame from which a message was sent. Uses <a href="#">Datetime type</a> format.        | optional    |
| sendoutDateTo     | <a href="#">String</a>        | The end date of the time frame until which a message was sent. Uses <a href="#">Datetime type</a> format. | optional    |
