

ProcessAction

Available in version v7+

An enumerated type that represents an action that can be applied to a running process.

Enumeration Values

Value	Description
CANCEL	Permanently stops work on a paused process. Can only be applied to a process with the status value PAUSED. Work cannot be resumed on a canceled process.
PAUSE	Temporarily halts work on a process. Can only be applied to a process with the status value PROCESSING. It is possible to resume work on a paused process.
RESUME	Continues to work on a process that is paused. Can only be applied to a process with the status value PAUSED.
